EXPECT MORE

EXPECT MORE

Tomberlin's heart and soul is reflected and measured not only by customer satisfaction—but more importantly the degree of delight that customer experiences while driving a Tomberlin. For Tomberlin it's not enough to simply fill a basic need. But rather, we strive to exceed customer expectations in all aspects of a product's design as it becomes an integral part of the user's lifestyle.

Tomberlin continually pushes itself to improve, and not rest on its laurels—because everything can and should be improved. Not only does the Tomberlin ENGAGE deliver on this philosophy—we are also proud of our newest generation of electric vehicles because it takes our core principles of safety, performance and style to a whole new level.

Engage E4 Ghosthawk shown with Matte Lux Blue body and black CoolTouch™ seats.

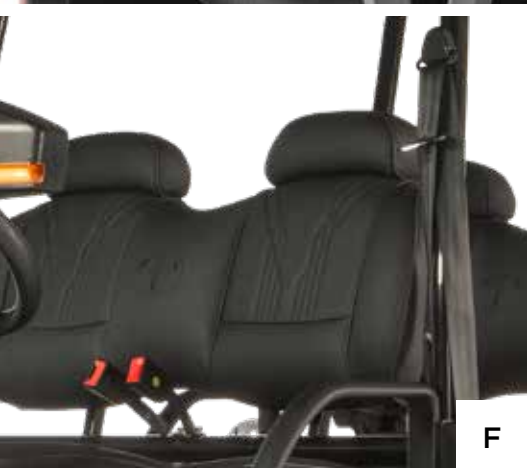

SAFETY EXPECT MORE

The Engage delivers class leading safety features for your family.[1] The exclusive Tomberlin 360 app continuously monitors the location of your vehicle and a unique ignition key with a locking steering column prevents joy rides and theft. A well-lit dash with strategically positioned controls encourages eyes to remain forward and prevent distractions while driving. A high strength steel frame, and upper structure with 3-point seat belts surround you and helps protect your loved ones. High performance high-low beams with daytime running lights, self-canceling turn signals and patented illuminated rocker panels brightly broadcast to those around you. All of these features allow you to see and be seen safely. You can **expect more** from Tomberlin when it comes to safety.

- A** The Tomberlin 360 telematics system puts you in control of your Engage experience. Active battery monitoring delivers piece of mind by sending notifications of low battery voltage whether you are home or a thousand miles away. Geolocation allows you to know where your Engage is at all times, or set up geofence alerts in case the vehicle is taken out of an approved area. The “Arm” feature will also track if the vehicle moves even if the vehicle is off, reducing the chance of unapproved usage.
- F** A heavy-duty e-coated steel frame and upper structure combined with NHTSA approved 3-point seatbelts secures and protects your occupants.
- B** Our high performance LED headlights feature high-low beams, daytime running lights, and turn signals. The turn signals are self-canceling, thereby reducing confusion for other drivers.
- G** We improved driver safety and convenience by moving the turn indicator, horn, lights, high-low speed, Forward-Park-Reverse, and wiper control onto dual steering-column levers.
- C** Travelling after hours can be risky, so we illuminated the left- and right-side rocker panels for increased nighttime visibility.
- H** Never again worry about setting the parking brake. Our electric brake automatically locks wheels when stopped, in park, or when the ignition is turned off. And our drilled front disk, rear drum hydraulic brakes give long life performance.
- D** With our newly designed dash the driver can always keep eyes forward. The digital instrument panel and operational controls are all front and center.
- I** Our new automotive LED taillights with reverse lights are as beautiful as they are functional. Plus, the roof-mounted brake light makes the Engage easier to see in traffic.
- E** The rearview camera with a 7-inch color display operates like an automobile, by assisting the driver when centering into a parking spot.
- J** New automotive style side mirrors with illuminated turn signals further increases your visibility to other drivers. The new mirrors features a break away design to prevent damage and are easily adjusted to see what's behind you.

[1] FACT: Unlike common PTV's, Tomberlin LSV vehicles exceed the strict LSV safety requirements set forth by the National Highway Traffic Safety Administration (NHTSA).

PERFORMANCE EXPECT MORE

Timberlin vehicles have a legacy of performance and the ENGAGE continues this tradition. Our high-performance powertrain combined with a sports car like suspension delivers an exhilarating ride. We've engineered an industry-first dash with the premium features of an automobile. And we lightened its footprint by including our EVOLVE lithium battery pack, improving both performance and range. Don't settle on performance, **expect more.**

K

The first power-steering system debuted in an automobile in 1951. And we were the first to offer it as standard equipment on a LSV (golf car) in 2018. By now, shouldn't all LSVs have it?

L

No competitor comes close to our AC powertrain. Drawing 450amps while producing 17hp, you'll notice the difference in superior hill climbing and acceleration when traveling up to 25 mph. [2]

The LX model features steel belted automotive tires with custom 14-in alloy wheels. Smooth riding, long wearing and responsive handling is standard. And steel belted radial tires are an option on Ghosthawk models.

M

Most brands do not offer the convenience of an onboard charger. We engineered our 1- kilowatt charger into the rear body for faster charging, and a better fit and finish. It goes with you wherever you go, and can plug into any standard wall outlet.

N

With the EVOLVE L210 Ah, 10 kWh lithium battery smart power system, you'll go farther— up to 80 miles between charges. Moreover, Evolve's intelligence warns you when remaining power is low, and slows you to "limp home" mode to assure you are never stranded.*

O

Our re-engineered canopy continues the sleek styling lines of the body, while controlling water flow both fore and aft.

P

The Engage drives like a luxury automobile thanks to its wide stance, optional steel belted radials (shown in L) and double A-arm suspension with adjustable coil-over-shocks.

Q

Ride confidently with a 5-year limited warranty.

[2] FACT: DC motors are cheaper, wear faster, and are inferior when accelerating and climbing hills.

*Up to 80 miles with a LX 2+2, larger vehicles and driving conditions will reduce range.

R

STYLING EXPECT MORE

The Engage is thoughtfully and artfully created to be a distinctive modern design and stand apart from the crowd. Its fit-and-finish meets the highest of standards using only the finest materials and expert craftsmanship. Its exquisite 3-layer paint finish is crowned by the illuminated hood ornament. The dashboard design integrates with the body lines, and features modern conveniences not found in a typical low speed vehicle. Cabin heating, ventilation, infotainment system, wireless charging and multiple storage locations for all your stuff is just the beginning. The CoolTouch luxury upholstery cradles you in a premium experience while staying cooler on hot sunny days. In a world of boring vehicles, you deserve to **expect more**.

R

An integrated canopy headliner featuring a rear view mirror, map lighting, multi-function dome lighting, integrated speakers and rear lighting all with fingertip controls, are all standard.

S1

A large 7-inch touch screen Infotainment system features Apple® Car Play, Android® Auto, Bluetooth, AM/FM and 180 watts of power.

S2

We modernized our cabin with a new dash including a front and center digital display showcasing speed, RPMs, odometer-trip meter, turn signal direction, forward-park-reverse, and high-low modes.

S3

Dual control levers on the steering column are only a finger away. They include a turn indicator, horn, lights, high-low speed, F-P-R, and wiper control.

S4

Enjoy heat or fresh air ventilation via adjustable, driver and passenger louvers.

S5

Conveniently store your phone, sunglasses, golf balls and other small items in a covered central storage area.

S6

Wireless cell phone charging station is thoughtfully integrated into the automotive dash.

S7

Room for your refreshments, easily carry four drinks in our Yeti®-sized cupholders.

S8

Stow a tablet and other valuables using the lockable, oversized glovebox.

T

Don't be caught in the rain, thanks to an umbrella conveniently included in the driver's side dash pocket.

U

Premium seating featuring CoolTouch™ technology cradles you during your drive. The soft and supple material feels like premium leather, but is easy to clean and weather resistant. Furthermore the Cool Touch material reduces the surface temperature of the vinyl on hot sunny days reducing the "sting".

V

We form our bodies and canopies from high-impact ABS material for long life. Then, we perfectly color-match them using our premium automotive paint process.

W

Stow larger valuables in the double opening and lockable trunk. This design accommodates golf bags as well as rear seat configurations with a second locking door for added convenience.

X

Upgrade with a roomy XL rear seat with seat belts. Designed with wider arm rests to accommodate adults and increased flip deck room for all of your gear.
